Digital wave beam formation and module in radio communication  
system and

its array receiver

Patent Assignee: HUAWEI TECH CO LTD (HUAW-N)

Abstract (Basic): CN 1352498 A

NOVELTY - Digital wave packet is used in wireless communication system. Channel response of signal vector expected is evaluated, and the coefficients of correlation of digital wave packets are calculated based on reference signal by using formula. The vector weighted that is relevant to largest co-relation system is output. The array digital signal is weighted by output vector weighted so as to output signal of digital wave packet. The amount of calculation is smaller comparing with the conventional method, so requirement for digital signal processing unit is lower in the invented module.
